## **Internship Certificate Ruoyu Chen**

Ruoyu completed her full-time internship, 40 hours a week, in our Munich office from November 19th to February 19th, 2020.

She rapidly settled in the office, was at ease with our technical facilities and software programs (apple-computers, CAD program Vectorworks) and combined it with her respectable technical knowledge. She navigated well within the office network from the start.

We soon learned to appreciate her professional and social input in the competition and project work as well as in the general debates in the office. She has been helpful towards her co-workers and thus supported the team effectively with her calm and productive manner. We were very satisfied by the commitment for her work, such as conceptualizing, drawing, modelling and organisational aspects of the office procedures.

Ruoyu adapted well to the team and developed into a valuable colleague. She faithfully fulfilled the tasks assigned to her.

During her intership at bauchplan ).( Ruoyu worked in the design team for a number of competitions and projects, listed below. She supported the team in aspects of designing and detailing as well as visualizing and drawing.

Due to the project locations, most of the projects are worked out in German language. If communication in German came to a limit while working with Ruoyu we always could switch to her very good English.

Marie-Theres Okresek  
Landschaftsarchitektin, DI  
Munich, 20.02.2020
